

SAMUEL RYBERG

DEVOPS ENGINEER

Malmö, Sweden | samuel.ryberg@gmail.com | +46 72 203 23 09 | [linkedin.com/in/samuelryberg](https://www.linkedin.com/in/samuelryberg)

PROFESSIONAL SUMMARY

DevOps and cloud engineering student with a strong foundation in software engineering and system design. Experienced in building and maintaining development infrastructure, including VPNs, version control servers, and automated build and deployment pipelines. Skilled in Docker, CI/CD, and cloud fundamentals, with hands-on experience from both academic work and self-driven projects. Seeking a DevOps or platform engineering role focused on building scalable and reliable systems.

PROFESSIONAL EXPERIENCE

GAME PROGRAMMER

Apr 2025 - Jul 2025

Eddaheim, Copenhagen, Denmark

- Established and maintained a WireGuard VPN for secure team collaboration
- Configured and managed a self-hosted Perforce server for version control
- Automated build and deployment pipelines, including Steam releases across development and production environments
- Led programming efforts on an indie project, delivering core systems under tight deadlines
- Developed gameplay systems in Unreal Engine 5 using C++ and Blueprints
- Optimized the player controller by migrating logic from Blueprints to C++

ASSOCIATE PROGRAMMER

Apr 2024 - Mar 2025

Flashbulb Games, Copenhagen, Denmark

- Collaborated with the backend team to implement and optimize matchmaking systems
- Reduced network bandwidth usage by approximately 50–75% through optimization of multiplayer systems
- Developed internal tools to automate workflows for QA, designers, and artists, improving team efficiency
- Improved network performance and reliability for online multiplayer gameplay

SKILLS

Docker, Terraform, Ansible, Google Cloud | GitHub Actions, Jenkins | C++, C#, Java, JavaScript, Python | Git, Perforce | Unreal Engine, Unity

EDUCATION

DEVOPS ENGINEERING STUDENT

Aug 2025 - Jun 2027

Jensen YH, Malmö, Sweden

- Studying DevOps principles, including system architecture, networking, and infrastructure design
- Gained experience with Ansible, DigitalOcean, backend development, and testing methodologies

GAME PROGRAMMING STUDENT

Aug 2021 - Jun 2024

The Game Assembly, Malmö, Sweden

- Completed 8 team-based game projects using C++ and Agile workflows
- Focused on systems programming, networking, and software engineering fundamentals
